

QUALITY POLICY STATEMENT

ALTEX Engineering Limited is committed to improving the quality of product and service offered to its customers.

To enable this continuous improvement process to be effective, it shall provide adequate resources and encouragement to maintain a Business Operating System, which meets the demands of the ISO9001 Quality Management System standard.

ALTEX Engineering Limited recognises that all employees can in some way affect the quality of product and service provided, and therefore will endeavour to ensure that the requirements of the system are communicated and that each individual understands their Business Operating System responsibilities.

Performance data generated from the system shall be published. It shall be used to measure the effectiveness of the Business Operating System and as a method of identifying areas of further improvement.

Due attention will be paid to the relevant statutory and regulatory legal requirements in the execution of it's business.

The design and content of the systems shall be formally reviewed for continued suitability at regular intervals.

This policy is made available to interested parties upon request.
